

# PRESS RELEASE

November 10, 2010  
FOR IMMEDIATE RELEASE

## **Kramden Institute Give-A-Thon® at Fort Bragg**

**On Saturday November 13, Kramden Institute and Lenovo will provide 250 computers to families stationed at Fort Bragg. The Give-A-Thon event will take place at the Reserve Center at Fort Bragg, NC.**

Research Triangle Park, NC – On November 13, Kramden Institute will donate 250 computers to children of enlisted men and women stationed at Fort Bragg who do not have computers in their homes. In many cases, the computers will connect children with their parents who are serving abroad. The children have been nominated by their teachers to receive the computers so they have access to technology and can achieve their full academic potential.

The PCs that the military families will receive were refurbished by volunteers from the computer manufacturer, Lenovo. Lenovo is Kramden's founding sponsor and continues to partner with Kramden to bridge the digital divide by connecting deserving students with recycled and refurbished computers. This is the third time that Lenovo has sponsored a Give-A-Thon for families of U.S. servicemen and servicewomen from Ft. Bragg.

Carrie Clark, Executive Director of Kramden Institute is pleased to be returning to Fort Bragg for another Award Day. "The Award Day at Fort Bragg is an incredibly rewarding event. It means a great deal to me and Kramden's many volunteers to place these refurbished computers into the homes of our military families and we greatly appreciate Lenovo's support."

### **About the Give-A-Thon**

The Give-A-Thon will be held Saturday November 13 at the Reserve Center at Ft. Bragg (BLDG A-6292 Lewis and Pratt St.) from 8:00 a.m. to 5:00 p.m. To learn more, call 919-293-1133 or go to [www.kramden.org](http://www.kramden.org).

### **About Kramden: Inspire. Encourage. Educate. Recycle.**

Kramden Institute, Inc. is a 501(c)(3) non-profit charitable institution whose mission is to bridge the digital divide for students who work hard in school but cannot afford a home computer. Kramden recycles and refurbishes computers to provide to students, inspiring them to achieve their full academic potential, while helping the environment. Kramden relies on volunteer efforts including computer refurbishing events, known as Geek-A-Thons®. To date, Kramden has over 3,600 volunteers and has awarded over 6,500 computers. To learn more go to [www.kramden.org](http://www.kramden.org).
