ABOUT US
Kramden Institute’s mission is to provide technology tools and training to bridge the digital divide. Since 2003, Kramden has refurbished and awarded more than 43,000 computers to disadvantaged families across North Carolina. Kramden expanded in 2014 to include educational programs and has since provided computer classes and STEM training to over 7,500 students and adults.

ONTHEIINECOMPUTER
Kramden offers several unique opportunities for groups who want to make a tangible contribution to their community.

Computers refurbished at GATs will be awarded to low-income families in need of a computer. Channel your inner geek alongside your fellow team members and help make a difference!

ONSITE COMPUTER REFURBISHING
Interested in having your team join us during the work-week? Contact us today to add your group of up to 10 to our volunteer schedule!

Larger groups of 11-50 can schedule a group opportunity for a $55 per person sponsorship fee. For $75 per person, we’ll include lunch and personalized “geek” shirts with your corporate logo.

LARGE GROUP VOLUNTEERING EVENTS
Kramden can accommodate large groups of up to 200 volunteers for a 1-3 day event either onsite or at a corporate or community location.

We provide the equipment, staff and know-how to ensure that your team can get the full refurbishing experience, regardless of where the event is held. Sponsorship costs vary from $5,000-$15,000.

ABOUT GEEK-A-THONS
The Geek-A-Thon is Kramden’s signature event in which volunteers (geeks) refurbish computers following an assembly-line process. Volunteering can take place at Kramden, or we can bring our warehouse to you. Volunteers do not need to be skilled technicians (or have ever opened up a computer) as Kramden has created an easy-to-follow process where anyone can participate!
